PROFESSIONAL SUMMARY

Product designer and product lead creating intuitive, high-quality digital experiences across responsive web, mobile, enterprise SaaS, operational platforms, and AI-powered workflows. Strong in end-to-end product design, user research, information architecture, interaction design, user flows, prototypes, high-fidelity UI, accessibility, and scalable design systems. Experienced working closely with product managers, engineers, and stakeholders to translate ambiguous problems into clear product decisions, validate direction, and ship practical solutions. Uses Claude, Codex/Copilot, and AI-assisted workflows to accelerate exploration, prototyping, documentation, and design QA.

WORK EXPERIENCE

Synergy Protection Agency (Freelance) | Product Designer / Product Lead Sep 2023 - Present

- Owned user research, stakeholder interviews, product direction, and UX/UI delivery for a web and mobile operational platform, translating complex needs into clear product decisions.
- Created journey maps, user and process flows, wireframes, interactive prototypes, and responsive high-fidelity UI; established reusable patterns to improve consistency across touchpoints.

Readytech | Product Designer / Product Owner (Contract) Nov 2025 - May 2026

- Product-managed and designed JR Ready enrolment planning, turning ambiguous requirements into research insights, flows, states, edge cases, prototypes, priorities, and **milestone 1 for 3K active TAFE students**.
- Partnered with product, engineering, and delivery teams to validate direction, resolve ambiguity, review builds, and maintain scalable UI patterns.

Atlassian | Designer 2022-2025

Enterprise Ready Login Customisation

- Shaped login customisation settings for **4.5 million monthly users**, addressing **600 support requests** and saving **\$57,000 annually**.
- Used customer feedback and usability signals to balance user needs, business rules, technical constraints, and high-quality enterprise UI.

AI Admin Hub audit log onboarding

- Product-managed engineers and designers across timezones to improve audit-log onboarding for **40+ new logs per month**, using NLP and input validation to improve structure, visibility, validation, and usability.
- Replaced a manual, error-prone workflow with a clearer automated flow, improving onboarding quality, system feedback, and validation for **4.5 million monthly users**.

Multi-Org Domain claim

- Designed complex account-management workflows that helped large enterprise customers manage shared-domain structures and increased Admin Hub revenue by an estimated **\$100k per month**.
- The feature is now used by **325 organisations**, covering **42,000+ Atlassian accounts** across shared domains.

Atlassian's first AI powered performance review tool

- Product-managed engineers, designers, and a program manager to deliver Atlassian's first AI-powered review tool, reducing review effort by 10 hours per employee each cycle.
- Drove over **30% company adoption in the first performance cycle**, saving **10,000 hours** in the last half of the financial year.

Atlassian Design Operations

- Created a standardised **Jira playbook adopted by 50+ designers**, improving how teams plan, track, and communicate design work.
- Built a Slack support agent to improve change-management support and delegate common requests.
- Integrated emerging AI practices into team workflows by creating a **full-day AI design workshop for 105 attendees**; facilitated monthly community talks with **30+ participants**.

ACADEMIC HISTORY

Auckland University of Technology | 2023

Bachelor of Communication Design

Yoobee Colleges of Creative Innovation | 2022

UX Design Micro Credential Course

CERTIFICATIONS

Certification of Interface Design | 2025

Shift Nudge

Ultimate Figma Masterclass 2.0 | 2025

Designership

SKILLS

- Product design:** Discovery, IA, journeys, flows, prototypes, responsive web/mobile UI.
- Design systems:** Components, reusable patterns, documentation, consistency, accessibility.
- Research:** Interviews, feedback synthesis, usability signals, validation, iteration.
- Visual/UI:** Layout, hierarchy, interaction design, polished UI, storytelling.
- AI workflows:** Claude, Codex/Copilot, exploration, prototyping, documentation, QA.
- Languages:** Fluent in Mandarin and English.
- Collaboration:** Product managers, engineers, designers, stakeholders, cross-functional teams.
- Tools/technical:** Figma, Adobe CC, Miro, Jira; learning HTML/CSS.
